

## RELY® H. pylori

A fast and cost-effective test to detect H.pylori infections

- ◆ Results in ten minutes
- ◆ Uses whole blood, serum or plasma
- ◆ Convenient storage temperature (2-30 °C)

# RELY<sup>®</sup> H. pylori

After a brief and transient clinical illness, H. pylori infections are asymptomatic, yet clinical trials have demonstrated that H. pylori is associated with 90% of patients with duodenal ulcers and approximately 80% of those with gastric ulcer.<sup>1</sup>

## Enhanced sensitivity\*

87 %

## Specificity\*

86 %

## Reliable

Procedural and external controls provided

## Procedural steps

Two step test provides results in 10 minutes

## Sample

Whole blood (fingerstick or venipuncture), serum or plasma

## Easy-to-use

Requires minimal training  
CLIA waived: whole blood

## Cost effective

Convenient room temperature/refrigerated storage and extended dating help manage inventory during seasonal shifts in testing

**Storage:** 2-30 °C (36-86 °F)

**Shelf life:** 18 months from date of manufacture

## Easy and reliable detection of H. pylori means better patient outcomes

- Minimizes the use of inappropriate treatment protocols
- Early detection and effective management of H. pylori reduce patient visits and cost of clinical follow-up
- Helps lower the risk of developing a more serious illness
